

OUR STRENGTH IS IN OUR PEOPLE

Martinrea is a diversified global automotive supplier, engaged in the design, development and manufacturing of metal parts, assemblies and modules, complex fluid management systems and aluminum products. We employ approximately 15,000 skilled and motivated people at manufacturing, engineering and technical centers in Canada, the United States, Mexico, Brazil, Germany, Slovakia, Spain and China.

The Martinrea Fluids Division is a leader in the production of fluid management systems. To strengthen our team at our engineering office in Hofheim / Taunus, Germany we are looking for a

## SENIOR PRODUCT DEVELOPMENT ENGINEER

### Your Responsibilities:

- Ownership of all aspects of product design and development process for assigned fuel handling system programs
- Development and coordination of technical quotes for new business opportunities with appropriate support departments such as R&D, test laboratory, costing and manufacturing
- Identification of design solutions necessary to meet the required engineering, manufacturing and financial targets within program timing
- Preparation and maintenance of up-to-date engineering records according to APQP and QMS requirements
- Initiation and implementation of continuous improvement suggestions
- Readiness to travel and participation in customer meetings

### Your Profile:

- Possession of Bachelor of Science Degree in Engineering or closely related field
- Proficient in CAD (design/drafting) to include Catia V5 experience (Unigraphics a plus)
- Microsoft Office Suite (Project, Word, Excel and Power Point)
- Strong experience with multi-layer polymer and elastomer material types and associated technologies (e.g manufacturing, chemical processes, fuel resistance), injection molding, plastic extrusion and plastic part assembly process and methods
- Regulations pertaining to automotive fuel systems design
- Good verbal and written communication skills
- Good organizational, interpersonal, learning and problem solving skills
- Proficient in German and English, 3rd language a plus.
- 7 years of related experience or equivalent
